

# VOICE CONNECTIVITY

Our system is a comprehensive telephone management solution

that seamlessly integrates with customers' PBX systems of all brands and models. Its primary function is to efficiently distribute incoming calls, enabling smooth and uninterrupted conversations. It connects customers' PBX systems, allowing seamless communication between different entities. Additionally, it easily integrates with various Cloud Call Center systems, streamlining and expediting telephone system-related tasks. Acting as a centralized hub, it manages various aspects of telephony, such as connectivity, codec configuration, and customizable Caller ID display formats.

# CONNECTIVITY

To empower everyone and organization with seamless digital connectivity, ushering in a realm of unparalleled intelligence and interconnectedness. By bridging the gap between people and technology, we pave the way for a transformative and awe-inspiring world, where innovation and connectivity converge to shape a future that transcends boundaries and redefines human potential.

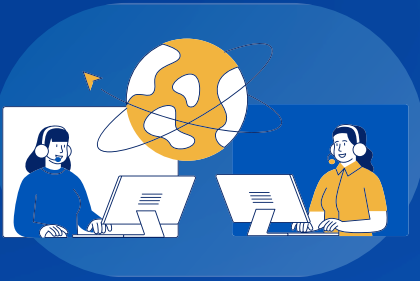

# FUNCTION & FEATURE

**Multi Provider Numbers**

**Inbound & Outbound Routing**

**Globalization Connections**

**Number Management**

## BENEFITS

### **Easy Connectivity:**

- We excel in connecting seamlessly in all formats.
- We have experience in various connection methods, including protocol and codec conversions.
- Our system is adaptable to configure and work with any operator effortlessly.

### **Managing and organizing numbers is simple and convenient :**

- We provide ready-to-use numbers.
- Available for both landline and mobile.
- In cases where customers already have existing numbers, we can manage and integrate them seamlessly.

### **Our solution is compatible with the current Cloud Contact Center platform:**

- Allowing for quick deployment and eliminating the need for time-consuming connections.
- Available for both internet or direct connect.
- Connections are already established, saving you valuable setup time.
